Annual Report

October 31, 2016

Advised By:

**FIRST
MANHATTAN
CO.**

Dear Shareholders:

Results over the past fiscal year were disappointing, with a decline of 5.78%, which compares to a gain of 8.81% for the Russell 2000 Value Index. In addition, we trailed the S&P 500 Index, which rose by 4.51%. Since our fiscal year end, and as this letter is being written, the Fund, on a calendar year basis, is up by almost 9%, significantly cutting its deficit versus the S&P 500 Index.

More importantly, on a longer-term basis, since inception in August 1998, the Fund's performance has been solid. For perspective, from inception in 1998 through the end of fiscal 2013, prior to the shorter-term last three-year period of weak performance (which was significantly weighed down by the significant decline in oil prices), the Fund produced an annualized return of 11.87%, outperforming the Russell 2000 Value Index by almost 200 basis points per year and the S&P 500 Index by 600 basis points per year. This 15-year period of outperformance included periods of underperformance, but our consistently-applied investing process and value discipline ultimately produced shorter-term periods of outperformance that more than made up for the weaker years. We believe that this disciplined, value investing process should lead to favorable risk-adjusted returns in the future.

Including the disappointing results of the past three fiscal years, the Fund's annualized return since inception (August 1998) was 8.38%, which is in line with the Russell 2000 Value Index and still ahead of the S&P 500 Index by 260 basis points per year. So, while our long-term record is satisfactory, we have been out of sync in the shorter term. It is worth noting that some of the recent years' performance discrepancy versus the S&P 500 Index can be attributed to the appreciation in the so called FANG stocks — Facebook, Amazon, Netflix, and Google — high multiple, large-capitalization, technology stocks that generally would not fall within our purview.

In the past, when our style has fallen out of favor, investors often asked: what will we do differently? The answer has always been that we will stick with what we feel comfortable – that is, our value investing approach, which focuses on, among other things, free cash flow generation, attractive returns on invested capital, and management teams that have meaningful ownership in their businesses as well as positive records of allocating capital. We also try to be disciplined in what we pay for investments. In this regard, we note that of the 30 stocks in the portfolio, only four have unrealized losses.

With the stock market showing (perhaps surprising) strength since the election of Donald Trump and along with the recent uptick in interest rates, it is reasonable to have short-term concerns about the stock market. For our part, we do not try to time the market and we feel comfortable with the long-term appreciation potential of our portfolio. Where portfolio weightings have gotten high by virtue of appreciation — such as Alamo Group, Drew Industries, Horizon Global, Mueller Industries and Neenah Paper – we have trimmed them back, but on balance we have consistently been able to report new portfolio additions that meet our value criteria. Specific examples of such additions that we've made over the last six months (and that are discussed below) include Capital Senior Living, Carrolls Restaurant Group, and Southwest Airlines.

Capital Senior Living (CSU) is one of the largest U.S. owner-operators of residential communities for senior adults. The company operates ~130 senior living communities in geographically concentrated regions with capacity of over 16,000 residents. At almost 65% of its communities, CSU owns the real estate, which underpins the valuation of the company. Virtually all of CSU's residents are directly responsible for paying their rent (a.k.a. "private pay"), which minimizes the company's exposure to U.S. government reimbursement risk (e.g., Medicare).

In our view, the senior living industry has attractive long term fundamentals, with the aging U.S. population driving strong demand growth. Although there are new senior living communities being built throughout the U.S., CSU has assembled (mainly via acquisition) a portfolio of quality assets in markets with limited supply growth. The company's average occupancy rate is approximately 90%.

Unlike many other public companies that own real estate, Capital Senior Living is not a REIT (real estate investment trust), so it is not required to use all of its cash flow to pay dividends to shareholders. Instead, over the past 5+ years, the company has primarily used its excess capital to make acquisitions at attractive returns. In the future, we expect acquisitions to continue to be a key driver of growth in CSU's underlying value. With a market capitalization of only \$500MM, CSU is a relatively small company, but in the fragmented senior living community industry, it is large. Its relatively large size, favorable reputation in the industry, and strong relationships with other community owners should continue to put the company in an advantageous position to make additional value-enhancing acquisitions. We have a positive view of CSU's management, whose interests are aligned with shareholders, and their ability to deploy the company's capital in a prudent manner.

At our average cost for CSU's stock of ~\$15/share, we estimate that we acquired CSU's senior living community real estate at an attractive 7% capitalization rate. In our view, the market's misconception surrounding oncoming industry oversupply likely played a part in our ability to acquire the position at this inexpensive price, which does not adequately reflect the quality of the company's portfolio, favorable industry fundamentals, strong shareholder-oriented management, and an abundance of high-return acquisition opportunities. We believe CSU's underlying value (and stock price) will grow as the company raises rents, increases occupancy, completes the remodeling of several properties, and executes accretive acquisitions.

Carrols Restaurant Group (TAST) is the largest Burger King franchisee in the U.S. with over 700 locations. Burger King is the second largest fast food hamburger chain (after McDonald's) in the U.S. A separate company, Restaurant Brands International, owns the Burger King brand, which it franchises to owner/operators like Carrols for a royalty fee. Although Burger King is a mature concept, it is a well-known and established brand and competes at the lower price point end of the restaurant industry, which tends to be more stable than the higher price point concepts. In 2010, 3G Capital, a highly-successful Brazilian investment firm, acquired control of Burger King (later renamed Restaurant Brands International) and has reinvigorated the brand.

Key to the TAST investment thesis is its ability to grow through the acquisition, integration, and improvement of other franchises. We've known Carrols' management for about a decade and have a high degree of confidence in their ability to operate restaurants and improve them after acquisition. Burger King/Restaurant Brands

International management has identified TAST as a preferred owner/operator and acquirer and has steered acquisition opportunities their way. Additionally, TAST has obtained (through a past deal with BK) a unique and valuable “Right of First Refusal”, which gives it the option to purchase any Burger King location sold in its 20-state Northeast/Midwest region. In other words, if, within this 20-state area, another franchisee agrees to sell a restaurant(s) to someone other than Carrols, the company has the right to step in and buy the restaurant(s) at that agreed upon price. In recent years, TAST has generally been able to acquire other franchised restaurants for 3.0-3.5x EBITDA, a price that is highly accretive to value and profits.

We acquired our position in TAST at an inexpensive valuation of 7.5x EV/EBITDA. While we believe this multiple will likely increase, we expect the primary driver of future value growth (and stock price appreciation) will be the aforementioned deployment of cash into highly accretive acquisitions of other Burger King restaurants.

Southwest Airlines (LUV) is the largest passenger air carrier in the U.S., with over 700 Boeing 737 aircraft operating almost 4,000 departures a day. We believe that the U.S. airline industry is much improved relative to its troubled past given significant consolidation over the past 5-to-10 years [four players now control ~80% of capacity] and a heightened focus on cycle management/profit maximization/supply discipline by management teams. Industry profitability is healthy and at record levels.

Beyond the overall favorable industry backdrop, we believe that Southwest Airlines is particularly well positioned. Southwest has a strong brand, a (net) debt free balance sheet [the best in the U.S. airline industry], and an unrivaled long-term track record of shareholder returns. Southwest operates significantly more U.S. direct flights than any other carrier and it has the opportunity to continue to grow. In our view, a direct / non-stop flight is a superior product compared to a flight that requires a stopover. The three other large “legacy” U.S. airlines — American, Delta, and United — operate “hub-and-spoke” networks that structurally require more flights with stopovers versus LUV’s “point-to-point” network. Southwest has a ~30% cost advantage relative to the three legacy airlines and has the highest geographic diversity. Additionally, LUV is in the midst of rolling out a new IT system that should lead to significant cost savings and revenue growth over the next several years.

While Southwest Airlines’ business is competitive, cyclical, and not without risks, we believe we initiated our position at a favorable price of about 10x earnings. In our view, this inexpensive purchase price was somewhat driven by investor skepticism about continued industry discipline and profitability. After months of extensive industry research, we gained conviction that LUV’s stock offered a favorable risk/reward profile at our purchase price of around \$42/share. We expect LUV’s stock to provide meaningful total returns over the next several years driven by multiple expansion, the aforementioned growth drivers, and share repurchases.

Ed Lefferman recently informed the firm that he will be retiring as Co-Portfolio Manager of the Fund effective December 31, 2016, though he will remain active at the firm. Going forward, Paul Patrick will be the sole portfolio manager of the Fund. Over the last 18+ years, since the Fund’s inception in August 1998, Ed has been a prolific stock picker and resolute in adhering to value investing principles with the singular purpose of growing the Fund’s capital for all shareholders. During the last four years, Paul has had the privilege of working with Ed as Co-Portfolio Manager and is very grateful for Ed’s wisdom and guidance.

We appreciate your continued confidence.

Sincerely,

Edward I. Lefferman
Co-Portfolio Manager

Paul E. Patrick
Co-Portfolio Manager

December 2016

Performance through 9/30/16 is 5.33% (one year), 7.53% (annualized five year) and 3.00% (annualized 10 year). The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 1-877-362-4099.

The information provided herein represents the opinion of the manager at a specific point in time and is not intended to be a forecast of future events, a guarantee of future results nor investment advice.

Investing involves risk including loss of principal. Holdings are subject to change.

*EBITDA – Earnings Before Interest, Tax, Depreciation, and Amortization
EV/EBIT – Enterprise Value to Earnings Before Interest and Tax*

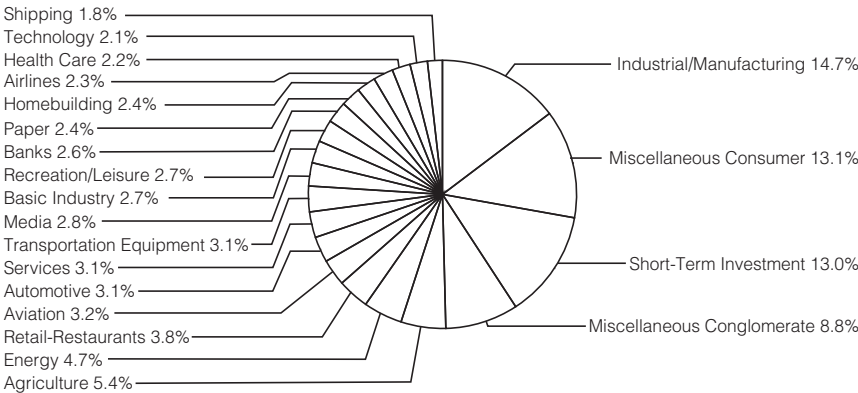

**Comparison of Change in the Value of a \$10,000 Investment
in the FMC Strategic Value Fund versus the Russell 2000 Value Index (Unaudited)**

AVERAGE ANNUAL TOTAL RETURN ⁽¹⁾ FOR THE PERIOD ENDED OCTOBER 31, 2016					
	1 Year Return	3 Year Return	5 Year Return	10 Year Return	Since Inception Return*
FMC Strategic Value Fund	-5.78%	-7.69%	3.39%	2.22%	8.38%
Russell 2000 Value Index ⁽²⁾	8.81%	4.47%	11.63%	4.91%	8.46%

- * Fund commenced operations on August 17, 1998.
- (1) As stated in the Fund’s prospectus, the annual fund operating expenses are 1.19%, not including acquired fund fees and expenses. The data quoted herein represents past performance; past performance does not guarantee future results. The return and value of an investment in the Fund will fluctuate so that, when redeemed, the investment may be worth less than its original cost. The Fund’s performance assumes the reinvestment of all dividends and all capital gains. Index returns assume reinvestment of dividends and, unlike a fund’s returns, do not include any fees or expenses. If such fees and expenses were included in the index returns, the performance would have been lower. Please note that one cannot invest directly in an unmanaged index. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Fee waivers were applied during earlier periods; if they had not been in effect, performance would have been lower. For performance data current to the most recent month end, please call 1-877-FMC-4099 (1-877-362-4099).
- (2) The Russell 2000 Value Index measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values.

Portfolio Composition⁽³⁾

- (3) Portfolio composition percentages are based upon the total investments of the Fund as of October 31, 2016.

October 31, 2016

1. Organization:

The Advisors' Inner Circle Fund (the "Trust") is organized as a Massachusetts business trust under an Amended and Restated Agreement and Declaration of Trust dated February 18, 1997. The Trust is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company with 56 funds. The financial statements herein are those of the FMC Strategic Value Fund (the "Fund" and together with the FMC Select Fund, the "Funds"). The Fund is classified as a "diversified" investment company under the 1940 Act. The Fund seeks to provide long-term capital appreciation by investing primarily in equity securities of U.S. companies with small to medium market capitalizations that First Manhattan Co., investment adviser to the Fund (the "Adviser" or "FMC"), considers undervalued by the market. The financial statements of the remaining funds of the Trust are not presented herein, but are presented separately. The assets of each fund within the Trust are segregated, and a shareholder's interest is limited to the fund in which shares are held.

2. Significant Accounting Policies:

The following is a summary of the significant accounting policies followed by the Fund in preparation of their financial statements. The Fund is classified as an investment company in conformity with U.S. generally accepted accounting principles ("GAAP") and as such follows the accounting and reporting guidelines for investment companies.

Use of Estimates — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the fair value of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

Security Valuation — Securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on NASDAQ), including securities traded over the counter, are valued at the last quoted sale price on the primary exchange or market (foreign or domestic) on which they are traded, or, if there is no such reported sale, at the most recent quoted bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used. The prices for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates.

All investment companies held in the Fund's portfolio are valued at the published net asset value.

Securities for which market prices are not "readily available" are valued in accordance with fair value procedures established by the Fund's Board of Trustees (the "Board"). The Fund's fair value procedures are implemented through a Fair

October 31, 2016

Value Pricing Committee (the “Committee”) designated by the Board. Some of the more common reasons that may necessitate that a security be valued using fair value procedures include: the security’s trading has been halted or suspended; the security has been de-listed from a national exchange; the security’s primary trading market is temporarily closed at a time when under normal conditions it would be open; the security has not been traded for an extended period of time; the security’s primary pricing source is not able or willing to provide a price; or trading of the security is subject to local government-imposed restrictions. When a security is valued in accordance with the fair value procedures, the Committee will determine the value after taking into consideration relevant information reasonably available to the Committee. As of October 31, 2016, there were no securities valued in accordance with the fair value procedures.

In accordance with the authoritative guidance on fair value measurements and disclosure under GAAP, the Fund discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The objective of a fair value measurement is to determine the price that would be received if an asset were sold or paid if a liability were transferred in an orderly transaction between market participants at the measurement date (an exit price). Accordingly, the fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The three levels of the fair value hierarchy are described below:

- Level 1 — Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 — Quoted prices which are not active, or inputs that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and
- Level 3 — Prices, inputs or proprietary modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Investments are classified within the level of the lowest significant input considered in determining fair value. Investments classified within Level 3 whose fair value measurement considers several inputs may include Level 1 or Level 2 inputs as components of the overall fair value measurement.

During the year ended October 31, 2016, there were no significant changes to the Fund’s fair valuation methodologies.

Federal Income Taxes — It is the Fund’s intention to continue to qualify as a regulated investment company for Federal income tax purposes by complying with

October 31, 2016

the appropriate provisions of Subchapter M of the Internal Revenue Code of 1986, as amended, and to distribute substantially all of its income to its shareholders. Accordingly, no provision for Federal income taxes has been made in the financial statements.

The Fund evaluates tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether it is "more-likely-than-not" (i.e., greater than 50-percent) that each tax position will be sustained upon examination by a taxing authority based on the technical merits of the position. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current period. The Fund did not record any tax provision in the current period. However, management's conclusions regarding tax positions taken may be subject to review and adjustment at a later date based on factors including, but not limited to, examination by tax authorities (i.e., the last three open tax year ends, as applicable), on-going analysis of and changes to tax laws, regulations and interpretations thereof.

As of and during the year ended October 31, 2016, the Fund did not have a liability for any unrecognized tax benefits. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the year ended October 31, 2016, the Fund did not incur any interest or penalties.

Security Transactions and Investment Income — Security transactions are accounted for on the date the security is purchased or sold (trade date) for financial reporting purposes. Costs used in determining realized gains and losses on the sales of investment securities are those of the specific securities sold. Interest income is recognized on the accrual basis from settlement date. Dividend income is recorded on the ex-date.

Expenses — Expenses that are directly related to the Fund are charged to the Fund. Other operating expenses of the Trust are allocated to the Fund on a pro rata basis based on the number of funds and/or relative net assets.

Dividends and Distributions to Shareholders — Dividends from net investment income, if any, are declared and paid to shareholders quarterly. Any net realized capital gains are distributed to shareholders at least annually.

3. Transactions with Affiliates:

Certain officers of the Trust are also employees of the Administrator, and/or SEI Investments Distribution Co. (the "Distributor"). Such officers are paid no fees by the Trust, other than the Chief Compliance Officer ("CCO") as described below, for serving as officers of the Trust.

A portion of the services provided by the CCO and his staff, each of whom is an employee of the Administrator, is paid for by the Trust as incurred. The services

October 31, 2016

include regulatory oversight of the Trust's advisers and service providers as required by Securities and Exchange Commission ("SEC") regulations. The CCO's services and fees have been approved by and are reviewed by the Board.

For the year ended October 31, 2016, the Fund was allocated CCO fees totaling \$2,801.

The Fund effects brokerage or other agency transactions through the Adviser, a registered broker-dealer, and pays brokerage commissions or related charges that are consistent with the applicable requirements of the Investment Company Act of 1940, the Securities and Exchange Act of 1934 and rules promulgated by the SEC. For the year ended October 31, 2016, the Adviser received \$43,807 in brokerage commissions from the Fund.

4. Administration, Distribution, Transfer Agent and Custodian Agreements:

The Trust and the Administrator have entered into an Administration Agreement under which the Administrator provides the Trust with administrative services, including regulatory reporting and all necessary office space, equipment, personnel and facilities. For its services under the Administration Agreement, the Administrator is paid an asset based fee, subject to certain minimums, which will vary depending on the number of share classes and the average daily net assets of the Fund. For the year ended October 31, 2016, the Fund paid \$162,601 for these services.

The Trust and Distributor are parties to a Distribution Agreement. The Distributor receives no fees for its distribution services under this agreement.

DST Systems, Inc. serves as the transfer agent and dividend disbursing agent for the Fund under a transfer agency agreement with the Trust.

U.S. Bank, N.A. acts as custodian (the "Custodian") for the Fund. The Custodian plays no role in determining the investment policies of the Fund or which securities are to be purchased and/or sold by the Fund.

5. Investment Advisory Agreement:

For its services to the Fund, FMC is entitled to an investment advisory fee which is calculated daily and paid monthly, at an annual rate of 1.00% based on the average daily net assets of the Fund. FMC has voluntarily agreed to reduce fees and reimburse expenses to the extent necessary to keep total annual Fund operating expenses (excluding interest, taxes, brokerage commissions, acquired fund fees and expenses and extraordinary expenses) from exceeding 1.30% of the Fund's average daily net assets. FMC may discontinue all or a portion of its fee reductions or expense reimbursements at any time. For the year ended October 31, 2016, FMC received advisory fees of 1.00% of the Fund's average daily net assets.

October 31, 2016

6. Investment Transactions:

The cost of security purchases and the proceeds from security sales, other than short-term investments, in thousands, for the year ended October 31, 2016, were as follows:

Purchases	\$50,641
Sales	89,329

7. Federal Tax Information:

The amount and character of income and capital gain distributions to be paid, if any, are determined in accordance with Federal income tax regulations, which may differ from U.S. generally accepted accounting principles. As a result, net investment income (loss) and net realized gain (loss) on investment transactions for a reporting period may differ significantly from distributions during such period. These book/tax differences may be temporary or permanent. To the extent these differences are permanent in nature, they are charged or credited to undistributed net investment income (loss), accumulated net realized gain (loss) or to paid-in capital as appropriate, in the period that the differences arise. Accordingly, the following permanent differences, in thousands, primarily attributable to real estate investment trust adjustments, have been reclassified to/from the following accounts as of October 31, 2016:

<u>Undistributed Net Investment Income</u>	<u>Accumulated Net Realized Loss</u>
\$6	\$(6)

These reclassifications had no impact on net assets or net asset value per share.

The tax character of dividends and distributions, in thousands, declared during the years ended October 31, 2016 and October 31, 2015 was as follows:

	<u>Ordinary Income</u>	<u>Long-Term Capital Gains</u>	<u>Total</u>
2016	\$ 183	\$ 669	\$ 852
2015	1,113	8,990	10,103

As of October 31, 2016, the components of distributable earnings, in thousands, on a tax basis were as follows:

Undistributed Long-Term Capital Gains	\$13,832
Late-Year Loss Deferral	(346)
Unrealized Appreciation	<u>25,264</u>
Total Distributable Earnings	<u>\$38,750</u>

Late-year loss deferrals represent ordinary losses realized on investment transactions from January 1, 2016 through October 31, 2016, that, in accordance with Federal income tax regulations, the Fund defers and treats as having arisen in the following fiscal year.

October 31, 2016

For Federal income tax purposes the difference between Federal tax cost and book cost primarily relates to wash sales, which cannot be used for Federal income tax purposes in the current year and have been deferred for use in future years.

The Federal tax cost and aggregate gross unrealized appreciation and depreciation on investments, in thousands, held by the Fund at October 31, 2016, were as follows:

<u>Federal Tax Cost</u>	<u>Aggregate Gross Unrealized Appreciation</u>	<u>Aggregate Gross Unrealized Depreciation</u>	<u>Net Unrealized Appreciation</u>
\$95,626	\$30,662	\$(5,398)	\$25,264

8. Other:

At October 31, 2016, two shareholders of record held 94% of the Fund's total outstanding shares. These shareholders of record were comprised of omnibus accounts that were held on behalf of various shareholders.

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be established; however, based on experience, the risk of loss from such claims is considered remote.

9. Regulatory Matters:

In October 2016, the SEC released its Final Rule on Investment Company Reporting Modernization (the "Rule"). The Rule which introduces two new regulatory reporting forms for investment companies — Form N-PORT and Form N-CEN — also contains amendments to Regulation S-X which impact financial statement presentation, particularly the presentation of derivative investments. Although still evaluating the impact of the Rule, management believes that many of the Regulation S-X amendments are consistent with the Fund's current financial statement presentation and expects that the Fund will be able to comply with the Rule's Regulation S-X amendments by the August 1, 2017 compliance date.

10. Subsequent Events:

The Fund has evaluated the need for additional disclosures and/or adjustments resulting from subsequent events through the date the financial statements were issued. Based on this evaluation, no additional disclosures or adjustments were required to the financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of The Advisors' Inner Circle Fund
and Shareholders of FMC Strategic Value Fund

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of FMC Strategic Value Fund (one of the series constituting The Advisors' Inner Circle Fund (the "Trust")) as of October 31, 2016, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of October 31, 2016, by correspondence with the custodian. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of FMC Strategic Value Fund (one of the series constituting The Advisors' Inner Circle Fund) at October 31, 2016, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

The signature of Ernst & Young LLP is written in a cursive, handwritten style in black ink.

(Unaudited)

All mutual funds have operating expenses. As a shareholder of a mutual fund, your investment is affected by these ongoing costs, which include (among others) costs for portfolio management, administrative services, and shareholder reports like this one. It is important that you understand how these costs affect your investment returns.

Operating expenses such as these are deducted from a mutual fund’s gross income and directly reduce its final investment return. These expenses are expressed as a percentage of a mutual fund’s average net assets; this percentage is known as a mutual fund’s expense ratio.

The following examples use the expense ratio and are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (May 1, 2016 through October 31, 2016). The table below illustrates your Fund’s costs in two ways:

- Actual Fund Return.** This section helps you to estimate the actual expenses after fee waivers that your Fund incurred over the period. The “Expenses Paid During Period” column shows the actual dollar expense cost incurred by a \$1,000 investment in the Fund, and the “Ending Account Value” number is derived from deducting that expense cost from the Fund’s gross investment return.

You can use this information, together with the actual amount you invested in the Fund, to estimate the expenses you paid over that period. Simply divide your account value by \$1,000 to arrive at a ratio (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply that ratio by the number shown for your Fund under “Expenses Paid During Period.”

- Hypothetical 5% Return.** This section helps you compare your Fund’s costs with those of other mutual funds. It assumes that the Fund had an annual 5% return before expenses during the period, but that the expense ratio (Column 3) for the period is unchanged. This example is useful in making comparisons because the Securities and Exchange Commission requires all mutual funds to make this 5% calculation. You can assess your Fund’s comparative cost by comparing the hypothetical result for your Fund in the “Expenses Paid During Period” column with those that appear in the same charts in the shareholder reports for other mutual funds.

Note: Because the hypothetical return is set at 5% for comparison purposes — NOT your Fund’s actual return — the account values shown may not apply to your specific investment.

	Beginning Account Value 05/01/16	Ending Account Value 10/31/16	Annualized Expense Ratios	Expenses Paid During Period*
Actual Fund Return	\$1,000.00	\$ 866.90	1.22%	\$5.73
Hypothetical 5% Return	1,000.00	1,019.00	1.22	6.19

*Expenses are equal to the Fund’s annualized expense ratio multiplied by the average account value over the period, multiplied by 184/366 (to reflect the one-half year period).

**NOTICE TO SHAREHOLDERS
OF
FMC STRATEGIC VALUE FUND
(Unaudited)**

For shareholders that do not have an October 31, 2016 tax year end, this notice is for informational purposes only. For shareholders with an October 31, 2016 tax year end, please consult your tax advisor as to the pertinence of this notice. For the fiscal year ended October 31, 2016, the Fund is designating the following items with regard to distributions paid during the year.

Long-Term Capital Gain Distributions	Ordinary Income Distributions	Total Distributions	Dividends Qualifying for Corporate Dividends Received Deduction (1)	Qualifying Dividend Income (2)	U.S. Government Interest (3)	Interest Related Dividends (4)	Short-Term Capital Gain Dividends (5)
78.52%	21.48%	100.00%	100.00%	100.00%	0.00%	0.00%	0.00%

- (1) Qualifying dividends represent dividends which qualify for the corporate dividends received deduction and is reflected as a percentage of ordinary income distributions (the total of short-term capital gain and net investment income distributions).
- (2) The percentage in this column represents the amount of "Qualifying Dividend Income" as created by the Jobs and Growth Tax Relief Reconciliation Act of 2003 and is reflected as a percentage of ordinary income distributions (the total of short-term capital gain and net investment income distributions). It is the intention of the Fund to designate the maximum amount permitted by the law.
- (3) "U.S. Government Interest" represents the amount of interest that was derived from direct U.S. Government obligations and distributed during the fiscal year. This amount is reflected as a percentage of ordinary income distributions. Generally, interest from direct U.S. Government obligations is exempt from state income tax. However, for shareholders of the Fund who are residents of California, Connecticut and New York, the statutory threshold requirements were not satisfied to permit exemption of these amounts from state income.
- (4) The percentage in this column represents the amount of "Interest Related Dividends" and is reflected as a percentage of ordinary income distributions. Interest related dividends are exempt from U.S. withholding tax when paid to foreign investors.
- (5) The percentage in this column represents the amount of "Short-Term Capital Gain Dividends" and is reflected as a percentage of short-term capital gain distributions that is exempt from U.S. withholding tax when paid to foreign investors.

The information reported herein may differ from the information and distributions taxable to the shareholders for the calendar year ending December 31, 2016. Complete information will be computed and reported in conjunction with your 2016 Form 1099-DIV.
